---

## Education

### JNTUH College of Engineering Sultanpur

*Bachelor of Technology in Computer Science and Engineering*

Hyderabad, TS

Dec 2021 – July 2025

### Sri Chaitanya Junior College

*TSBIE*

Hyderabad, TS

June 2018 – March 2020

## Experience

### Data Analyst Intern

*Edgenius Skillfied Mentor Prvt. Ltd*

Feb 2026 – May 2026

Hyderabad, TS

- **Banking Data Analysis:** Built an end-to-end term deposit prediction model using Python (Pandas, Scikit-learn) and Power BI on 40K+ records, achieving 90 percent accuracy and delivering actionable insights that improved campaign targeting efficiency by 20 percent.
- **Term Client Deposit Analysis:** Built a data-driven banking analytics solution using Python and Power BI on 41K+ customer records, increasing campaign performance visibility by analyzing 4,640 subscribers and uncovering high-impact factors driving an 11.27 percent conversion rate.
- **Colorectal Cancer Survival Analysis:** Analyzed 1,000+ Colorectal cancer patient records and constructed a survival prediction model achieving 85 percent accuracy and 0.87 ROC-AUC, identifying key mortality risk factors to support data-driven clinical decisions.
- **Diabetes Risk Prediction:** Architected a machine learning-based diabetes risk prediction system on 750+ clinical records, delivering 89 percent accuracy and enhancing early high-risk detection by 25 percent.

## Projects

### Full-Stack Data Analytics Capstone | *SQL, Excel, Power BI, Tableau*

- Designed and delivered an interactive Road Accident Analysis Power BI dashboard, analyzing 50,000+ records to uncover high-risk zones, reduce reporting time by 40 percent, and enable data-driven safety decision-making through advanced DAX, data modeling, and KPI visualization.
- Engineered an Advanced Excel Road Accident Dashboard analyzing 417K+ records using Pivot Tables, Power Query, and results-driven KPIs to automate reporting and generate actionable safety insights.
- Architected an interactive Tableau Road Accident Dashboard analyzing 195K+ casualties and 144K+ accidents, delivering YoY trend analysis, geospatial risk mapping, and severity insights to identify high-risk patterns and drive data-informed safety decisions.

### Airbnb Listings Analysis | *Python (EDA)*

- Conducted data cleaning, EDA, and pricing analysis on 5,000+ listings to support market and revenue insights.
- Leveraged statistical analysis techniques to assess demand patterns for 300+ room types; insights gleaned directly influenced promotional strategies and resulted in an increase of 15 percent in bookings during peak seasons.
- Identified 60–65 percent market share for entire homes priced 30–40 percent higher, supporting segmentation and pricing strategy analysis.

## Technical Skills

**Languages:** Java, Python (Pandas, NumPy), SQL (PostgreSQL), C/C++, HTML/CSS

**Business Intelligence:** Power BI (DAX, Power Query), Tableau

**Data Analysis:** EDA, Statistical Analysis, Hypothesis Testing, Data Wrangling

**Machine Learning:** Regression, Classification, Feature Engineering

**Tools:** Excel (Pivot Tables, XLOOKUP), Git, Jupyter Notebook

## SOFT SKILLS

Strong capabilities in data-driven decision making, data interpretation, and data storytelling, complemented by effective stakeholder communication skills.

## LANGUAGES

English, Hindi, Telugu – Fluent
